

Beim Goods Livestream Chat TTS Privacy Policy

Effective Date: May 31, 2026

Last Updated: August 22, 2026

Scope: This Privacy Policy applies exclusively to the Beim Goods Livestream Chat Text-to-Speech (Phase 1) and the Beim Goods TTS Livestream Kit. Separate privacy policies will govern future product and service rollouts.

Our Privacy Commitment

Beim Goods is built on a privacy-first principle: we collect the minimum information necessary to operate the service and nothing more. We do not sell customer information.

1. Who We Are

Beim Goods is registered in Texas. We operate the Beim Goods Livestream Chat TTS browser extension ("the Extension") and sell the Beim Goods TTS Livestream Kit ("the Kit").

2. What We Collect

Information we collect for the Extension

- **Install token:** a randomly generated anonymous identifier created when you install the Extension. It has no connection to your identity, browser profile, email, or any personal information.
- **License ID:** an opaque identifier assigned when you subscribe, used only to verify your subscription status.
- **Trial start date:** the timestamp when your trial began, used to calculate days remaining.
- **Subscription status:** active, trial, or expired, used to gate TTS functionality.

Information we collect for Kit orders

When you purchase the Beim Goods TTS Livestream Kit, the following information is collected through Stripe's checkout page for the sole purpose of fulfilling and shipping your order:

- Full name
- Shipping address
- Phone number (for shipping carrier delivery notifications and issues)
- Billing address
- Email address (for order confirmation and shipping updates)

This information is collected and stored by Stripe on Stripe's platform. Beim Goods accesses this information solely to fulfill your order. We do not sell, rent, or share your personal information with any third parties for marketing or any other purpose unrelated to order fulfillment.

Information we do NOT collect

- Your IP address (not stored or logged)
- Browsing history or activity on any website
- The content read by TTS
- Your usage time, pattern, on/off, etc.
- Any information about the websites you visit
- Device identifiers beyond the anonymous tokens and IDs

3. Payment Information

Payments for both the Extension subscription and the Kit are processed by Stripe on their platform. When you subscribe or purchase a Kit:

- You enter payment details directly on Stripe's checkout page, which is hosted and controlled by Stripe.
- Beim Goods never receives, sees, or stores your credit card number.
- For Extension subscriptions, Stripe processes your payment and sends our server a notification. Our system reads only the anonymous license ID and tokens from that notification. No personal billing information is extracted.
- For Kit orders, Stripe provides us with your name, shipping address, phone number, and email so we can fulfill and ship your order.
- Your Stripe name, email address, and the last 4 digits of your payment info are made visible to us by Stripe on Stripe's dashboard. We are unable to disable this.
- Stripe's handling of your payment data is governed by Stripe's own Privacy Policy at stripe.com/privacy.

4. How We Use Information

Extension: The anonymous token and license status are used solely to determine whether your trial is active, expiring, or expired; verify that you have an active subscription; and display appropriate in-browser notifications about your trial or subscription status.

Kit orders: Your name, shipping address, phone number, and email are used solely to fulfill and ship your order and to communicate order status updates. Once your order is delivered, we retain this information only as long as necessary for customer support and legal compliance purposes.

We do not use this information for advertising, analytics, profiling, or any purpose other than operating the Extension and fulfilling Kit orders.

5. Data Storage

Your anonymous token and license status are stored in:

- Your browser's local storage (e.g. `chrome.storage.local`), on your device only
- Cloudflare, our server-side storage, containing only the anonymous install token and subscription status. No personal data is stored on our side.

Kit order information (name, shipping address, phone number, email) is stored by Stripe on Stripe's platform and accessed by Beim Goods only for order fulfillment.

6. Data Sharing

- We do not sell, rent, or share your information with third parties.
- Stripe processes your payment on their platform. They receive billing information you enter directly on their checkout page.
- For Kit orders, your shipping information may be shared with our shipping carrier solely for the purpose of delivering your order.
- Cloudflare hosts our infrastructure and may process request metadata in accordance with Cloudflare's privacy policy at cloudflare.com/privacypolicy.

7. Cookies and Tracking

The Extension does not use cookies, tracking pixels, fingerprinting, or any analytics tools. We do not track your behavior.

8. Data Retention

Your anonymous token and subscription status are retained for as long as you have an active subscription or an installed Extension. If you uninstall the Extension and/or your subscription lapses, your data is eligible for deletion upon request.

Kit order information is retained by Stripe in accordance with Stripe's data retention policies. You may request deletion of your order information by contacting us.

9. Children's Privacy

We do not knowingly collect any information from children.

10. Your Rights

Because we collect no personal data for the Extension, most privacy rights (access, correction, portability) do not apply in practice. For Kit orders, you may request access to or deletion of your order information. You may also:

- Request deletion of your anonymous install token and license record
- Request deletion of Kit order information held by us
- Contact us with any privacy questions or concerns

11. CCPA and GDPR

We do not sell personal information. We do not collect personal information as defined under the California Consumer Privacy Act beyond what is necessary for Kit order fulfillment.

Where EU data protection law applies, we process anonymous technical identifiers on the basis of legitimate interests in operating and securing the service. Kit order data is processed on the basis of contractual necessity.

12. Future Products

This Privacy Policy applies only to the Beim Goods Livestream Chat TTS (Phase 1) and the Beim Goods TTS Livestream Kit. Future Beim Goods products, including hardware devices and features, will be governed by separate privacy policies published at the time of their release.

13. Changes to This Policy

We may update this Privacy Policy. Changes will be posted at beimgoods.com with an updated effective date. Continued use of the Extension constitutes acceptance of the updated policy.
